Introduction

Decentralized Finance (DeFi) refers to the digital assets and financial smart contracts which contains applications and protocols built on Ethereum blockchain. DeFi is now one of the fastest growing sectors in crypto. Through smart contracts, DeFi provides an alternative system to financial institutions for people. Its a global, open alternative to every financial service you use today — savings, loans, trading, insurance and more — accessible to anyone in the world. The benefits of DeFi over traditional banks include transparency, permissionlessness, flexibility, interoperability, global availability among others.

Understanding Community

Community should be centered on value creation for both the organization and its members. The common interest should result in value that can be realized.

Need for Community

What people learn through their experience is rarely documented and always learnt by the word of mouth. We make a better decentralized financing system where experiences can be shared among its members.

Providing Value to Community

There are some basic guiding principles for all our members, which should be followed to make the community better. Our members should accept these principles and they agree to abide by the following Community Values:

- ✓ Respect for the rights, differences, and dignity of others
- ✓ Honesty and integrity in dealing with all members of the community
- ✓ Accountability for personal behavior

THOU

Introduction

THOU (Thousand token) is a Decentralized Finance (DeFi) token contract on Ethereum Blockchain, made for the community, and initially distributed among the community members. THOU is a limited supply token providing value to asset and is carefully crafted to increase in value over time.

Why this Token?

Starting a project often begins with the central question of identifying resources and assets. When thinking specifically about assets its important to keep a broad definition. We have comprehensive plans already in place that the developers are working to enact. It is important to understand what the focus of those plans is when starting to formulate new project ideas. Ideally, new creative projects work hand in hand with these previously envisioned community goals. The members in the community will be an essential tool for communicating the depth and breath of the way our creative project prospers.

The Problem

While there are many community tokens floating around, we decided to take a better look at what they all are missing and fix those shortcomings in our new and better community project. While many of them are good projects, their distribution of tokens among the community is highly unequal. This leaves the community with inequality in values.

How we solve this problem?

Our token builds a better community by following the rules of equality. The token will be divided among all the community members and no one will be holding a large amount of token. This strategy in asset distribution will hold the key for the betterment and growth of the community.

The Benefits

Strategic distribution gives rise to equality of rights and solves the problem of stability. Uniformity in distribution also helps the community grow and sustain without any conflict. This uniformity will further fuel the growth of this community

and make a bigger database and increase profits for all its members.

Future Plans

Our future plans are for the betterment of the community, for the development of a better sustainable project and for the profit of all its members. It currently include the following:

- ✓ Build a Better Community
- ✓ Community Growth
- ✓ Token Stability, widespread reach and boost

Commandments

These are the list of commandments to be followed by all the members, including investors, marketers, advertisers, community moderators, developers, designers, planners, management team, critics and everyone else.

- THOU shall not cheat.
- THOU shall not scam.
- THOU shall not spread FUD.

Tokenomics

Total Tokens = 1000 THOU

Community Distribution = 650 THOU

Uniswap Listing = 300 THOU

Dev Team = 50 THOU

Why Dev Team hold 50 Tokens?

Dev Team will be holding only 50 THOU to ensure future development of the project. It will also give the team the feeling of token holder and as a Token holder they will be continuously reminded about the development goals and strategies, which is not possible otherwise.

Token Details

Name: **THOU**

Symbol: **THOU**

Decimal: **18**

Contract address:

0x65002003e0d124ceea783cc7cf64dfefcbfed0

Total supply: **1000**

Roadmap

1. Project Launch

Launch of THOU project and its initial requirements like websites, whitepaper, social connections, solidity contracts, etc.

2. Presale Phase

Presale opens to the public with 1:1 ratio with Ethereum or (1 ETH = 1 THOU) and distributed among the members, on first come first serve basis. Presale will be conducted on phases with strategy on further distribution. Interestingly, for the early investor benefit, we provide 50% bonus on First Phase of Presale and will be reducing bonuses on Second Phase of Presale and so on.

3. Uniswap Listing

THOU shall be listed on Uniswap (a decentralized exchange) with 1:1 ratio with Ethereum or (1 ETH = 1 THOU) and will be available for the public. Total of 300 THOU will be added on Uniswap liquidity pool.

4. Uniswap Liquidity Lock

Initial liquidity provided by us will be 300 THOU and 300 ETH, which will all be locked for 1 year. This will be done to gain trust in the community and avoid any FUDs or investment loss or price dumps.

5. Community Growth

We will look forward to grow the community and get listed on price tracking sites like coinmarketcap and coingecko. We will also try to get it listed on more exchanges.

6. Yield Farming

THOU Yield farming will allow THOU holders to earn governance tokens for staking THOU on the platform.

7. Farming Vaults

THOU Yield Farming Vaults will allow THOU holders to lock the Farms and earn much higher APY.

8. Lending Platform

THOU Lending Platform will allow users to get flash loans and provide loans to others. We have plans to add many tokens to our platform for easy lending and borrowing.

9. Sub-Projects and Platforms

More projects and platforms will be launched under THOU, and community members will be first to get the news and profit. Detailed plans and discussions on this will be available soon after the success of THOU. Furthermore, THOU holders will receive airdrops on our future tokens.
